IITG Project Outcomes Form - Report Outcomes : Entry # 885

Name of person reporting outcomes

Sarah Lynch

Email

selynch@binghamton.edu

IITG Project Title

2019-Binghamton (BU)-Lynch-ePatient-2

Have you applied for, or received additional funds? (choose all that apply):

- Consider the project complete, and do not intend to seek additional support

In 1-3 sentences, how would you describe how your project helps advance the SUNY mission?

The SUNY mission carries themes of quality education, cost-savings and collaboration. These were all goals of this project: to create a software that would save students and institutions money, while teaching students through application of electronic medical-record based learning. One future goal of the project, now that we have established the platform, is to increase the collaboration among SUNY healthcare education programs. By design, every SUNY campus has a varied mix of health professions, and tools like ePATIENT will promote collaboration across professions.

We have not currently applied for any additional grants and in-kind services are in line with the original estimates. Future grant applications are possible, considering the potential value of software like this in the "post-COVID" era.

1st Choice:

Instructional Technologies

Instructional Technologies

- Cloud-Based Teaching & Learning Environments

2nd Choice:

Discipline Specific Pedagogy

Discipline Specific Pedagogy

- Professional Education

3rd Choice:

Connected Learning Models

Connected Learning Models

**IITG Project Outcomes Form - Report Outcomes :
Entry # 885**

- Active Learning

What recommendations would you make to scale-up or share your project more broadly (within an educational sector, or perhaps SUNY-wide)?

In order to share more widely, we will need to spread the word about the software's capabilities and develop a forum for finding and developing collaborations across campuses. We are exploring the idea of student and faculty "super users" who can reach out to SUNY health education programs and demonstrate the process. We are also looking into current resources that SUNY provides for collaboration and communication as a method to connect faculty with similar projects.

Healthcare Profession program faculty: MD, DO, NP, PT, PA, OT, PharmD, nursing, CMA

Interprofessional education faculty

Instructional designers who assist in healthcare professions may be interested as well

Unsure at this time

Do you wish your current abstract to be used?

Yes
