

IITG Project Outcomes Form - Update Outcomes : Entry # 207

Name of person reporting outcomes

Melissa Miskiewicz

Email

miskimj@buffalostate.edu

IITG Project Title

2012-Binghamton-Blake-Presentations Unplugged

Have you applied for, or received additional funds? (choose all that apply):

- Consider the project complete, and do not intend to seek additional support

File One Upload and Brief Description

This is a copy of the survey, post-item analysis.

File One

[Final-POSTitemAnalysisSurvey-August2013.docx](#)

File Two Upload and Brief Description

This is a copy of how the item analysis was applied, with Cronbach's alpha reported for each scale

The survey validation was never completed. A large data set was collected (n=600), but factor analysis was not undertaken. Preliminary review of item interactions indicate that there is no relationship between ICT engagement and learner success based on GPA.

There was a relationship to be explored between SAT writing and ICT expectancy values, and between SAT reading and Self-beliefs.

Locus of Control seems to have significance for success based on GPA. Negative External Locus of Control has an inverse relationship to GPA.

This survey requires factor analysis.
