Project Name Multimedia Recording Suite

Principal Investigator Lisa Melohusky

Campus Fredonia, State University College at

Year of Project 2012

Tier Tier One

Project Team

- T. John McCune, SUNY Fredonia
- Dawn Eckenrode, SUNY Fredonia

Overview Summary

Support of technology to create and study podcasting and multimedia material incorporated into learning materials.

Outcomes Summary

Lab was created to support the cross platform content. Photographs of the lab, along with links to podcasts created and tutorials are available.

Project Abstract

Development, application and assessment of innovative use of instructional technology to improve student engagement and learning across disciplines.

Implementation of the Power of SUNY Innovative Instruction framework, including the SUNY Learning Commons, SUNY Learning Network, Open SUNY and other methods to promote sustainable, shared services that can be replicated throughout SUNY.

Development/use of metrics that can demonstrate the effectiveness of the instructional innovation – including

(but not limited to) assessment data, student feedback, evidence of direct or indirect learning or other successful learning outcomes.

Public and/or private partnerships to improve quality of the learning experience as well as provide additional funding or in-kind resources to support innovation.
