IITG Project Title

2015-Old Westbury-Chipley-Old Westbury-Open Media Lab

Have you applied for, or received additional funds? (choose all that apply):

- Consider the project complete, and do not intend to seek additional support

Access

The Open Media Lab website offers 20 multimedia production tutorials that outline strategies for producing high-quality media with mobile or professional equipment and provide step by step instructions for producing and distributing with free multimedia production software. Created with both educators and students in mind, the OML makes multimedia authorship accessible for those working with basic resources.

The estimated value of in-kind services or grants is $0 at time of this report, as outcomes from subsequent grant applications are still pending.

1st Choice:

Instructional Design

Instructional Design

- Online Education
- Student Learning Support
- Supplemental Instruction

2nd Choice:

Connected Learning Models

Connected Learning Models

- Virtual Learning Communities

3rd Choice:

Faculty Development

Faculty Development

- Faculty Digital Literacy

What recommendations would you make to scale-up or share your project more broadly (within an educational sector, or perhaps SUNY-wide)?

The Open Media Lab offers both multimedia teaching / learning resources and comment fields on the OML SUNY Learning Commons site, allowing educators and students to post questions and feedback. To enhance creator / user dialog and encourage a wider implementation of OML resources, we recommend a series of one day workshops for the project creators to share outcomes and strategies with colleagues from across SUNY and across disciplines, and to further support replication and innovation utilizing the Open Media Lab resources.

If you would like to create a community of practice within the SUNY Learning Commons, please describe "members of your community" who would be most interested in your outcomes. Please be specific (e.g., math faculty, instructional designers, student services, registrars, administrators, accreditation or assessment specialists).

The Open Media Lab supports multimedia education across disciplines. Potential users of the site within the SUNY community include faculty teaching media or those who wish to incorporate or support digital humanities projects as well as instructional designers and those working within the realms of digital literacy.

Do you intend to create an ongoing "Community of Practice" within the SUNY Learning Commons to continue work and dialog regarding this project?

Yes

Overall, how successful was IITG in meeting your project goals? (You may elaborate on your response in the final question if not addressed elsewhere.)

Extremely successful

Do you wish your current abstract to be used?

Yes

File One Upload and Brief Description

This file is a series of excerpts from the site highlighting text and video tutorials, teaching resources and examples of student work.
