IITG Project Title
2015-Alfred State-Case-ADA Necessity

Have you applied for, or received additional funds? (choose all that apply):

- Have applied for campus funds to support this project

Access Keywords: Enrollment, Diversity, Capacity, Affordability
Making our course content accessible to the widest possible student population will increase enrollment by reaching those students that need additional support. Training and educating faculty about accessibility will insure that our courses have no barriers to students with special needs and make us a compassionate campus.

Completion Keywords: Completion, Persistence, Transfer, Retention
Our project would support completion by removing any barriers to students accessing and comprehending content. It is too early to measure any significant student achievement. We have just procured an automatic captioning solution through campus funds. We hope to have measurable data by next semester.

Success Keywords: Applied Learning, Student Supports, Financial Literacy, Career Success
Having accessible content will help with any of those areas for student access to information.

We procured automatic captioning services through Ensemble Anthem along with a campus wide license for Ensemble Anthem. Cost approximately $4000.

1st Choice:
Assessment, Understanding, Monitoring Student Progress

Assessment, Understanding, Monitoring Student Progress

- Adaptive Learning Technologies

2nd Choice:
Instructional Design

Instructional Design

- Course Design/Development/Re-Design
- Online Education
- Student Learning Support

3rd Choice:
Faculty Development

Faculty Development

- Sharing Best Practices

What recommendations would you make to scale-up or share your project more broadly (within an educational sector, or perhaps SUNY-wide)?
To scale up our project would take having speakers once per semester during Professional Development Week to

continue conversation and education on our campus. These would have to be compensated, regionally or nationally recognized speakers. Once we have our campus close to full compliance, we would present on a larger stage.

Do you intend to create an ongoing "Community of Practice" within the SUNY Learning Commons to continue work and dialog regarding this project?
Unsure at this time

Overall, how successful was IITG in meeting your project goals? (You may elaborate on your response in the final question if not addressed elsewhere.)
Extremely successful

Do you wish your current abstract to be used?
Yes
